

DI Mapping

Stay in front of the competition!

Drillinginfo is now providing you with a range of mapping products and subscriptions to keep up with current activity for your areas of interest. Our Regional Well Activity Maps will keep you ahead of the curve, providing you with detailed information including the previous month's new permits and completions. Get an overview of the entire region or for a more in-depth look choose a higher-scale detail map with annotations. Better yet, choose a package which includes an overview and the detailed sections to keep you on top of your game!

South Permian Basin
Well Activity Overview

Let DI work for you!

Let Drillinginfo expand your exploration capabilities with our Regional Lease Activity Map. Quickly identify leasing trends with the a regional overview map or zoom in with one of our higher-scale detail maps that focus on your area of interest. DI's Lease Activity Maps will keep you up to date by providing you the timeliest leasing activity in the oil patch. Higher-scale detail maps include grant-ee name and instrument date annotations. Available for you in paper and digital formats!

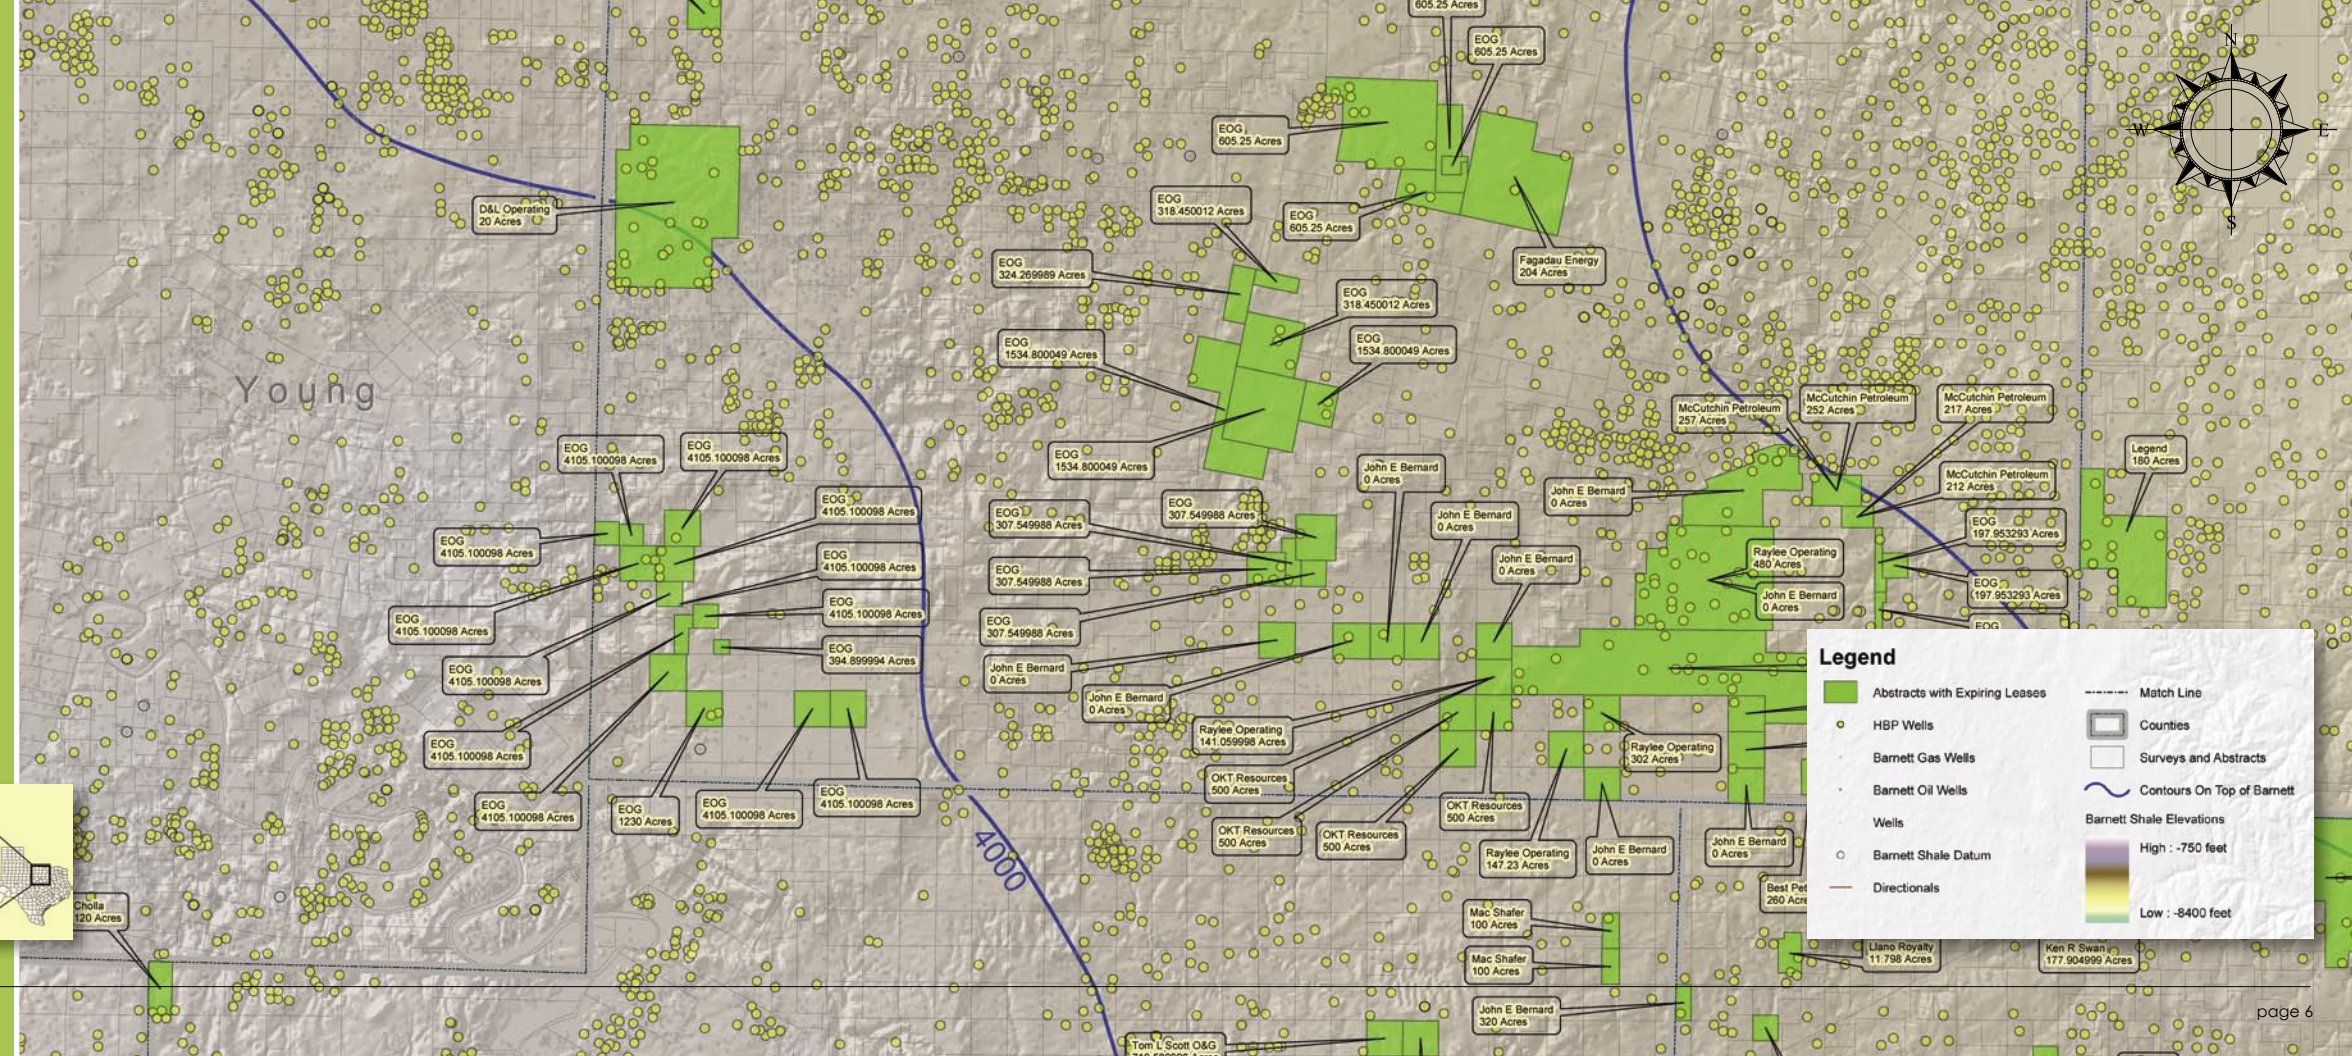

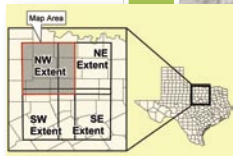

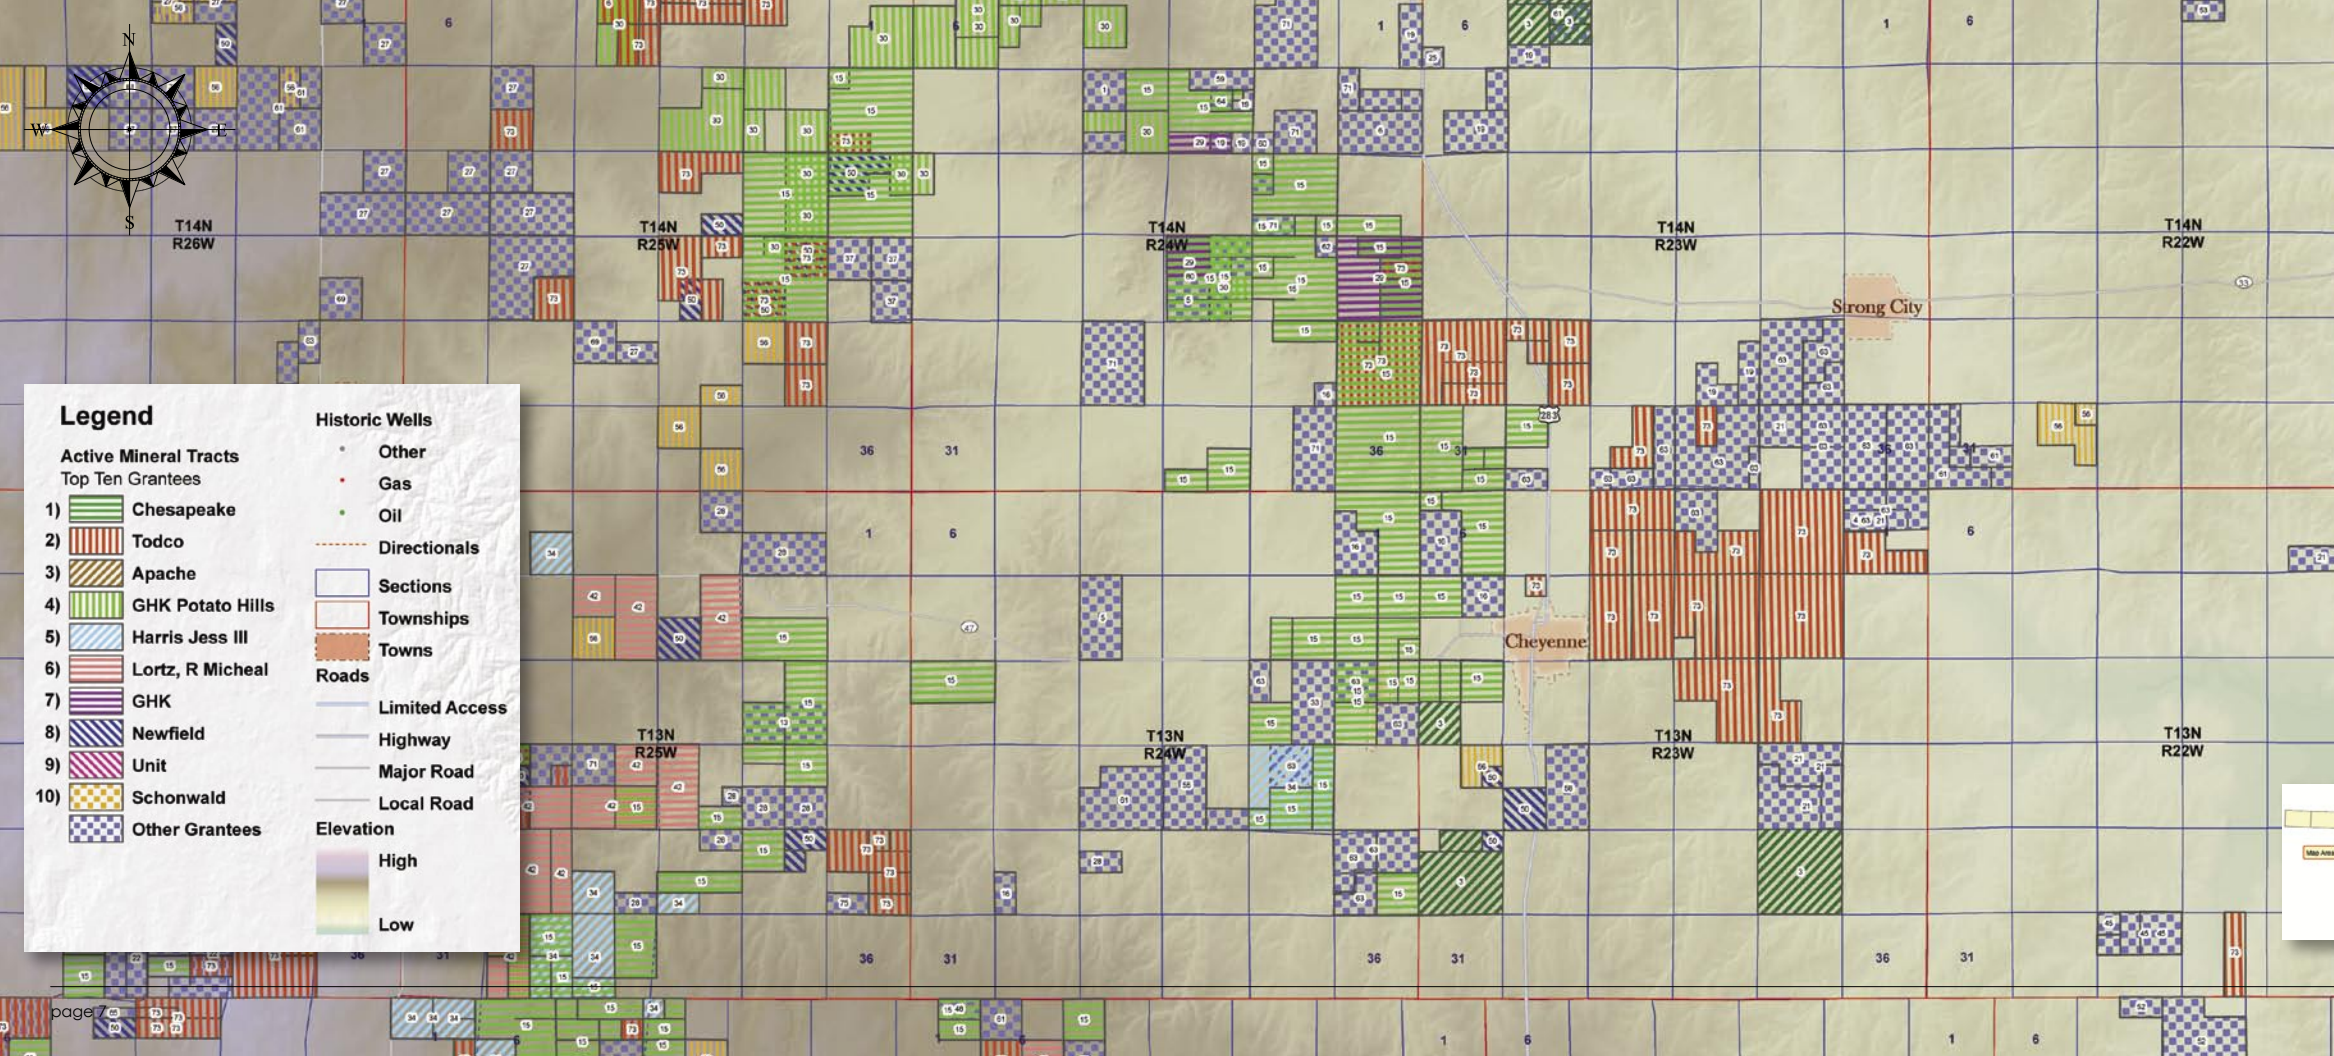

South Permian Basin Study
Lease Activity

Want to expand your holdings in a hot play?

Leasing activity over the past few years has far exceeded the industry's ability to get the prospects drilled. Be ahead of the game, knowing when and where these expiring tracts will occur. Quickly see which leases will reach the end of their primary term 6 months forward and which may be HBP'd with currently producing wells. The higher scale detailed maps come annotated with grantee name and total gross acreage. Expand your holdings with a DI Map Subscription!

DI LandTrac Unified Land and Exploration Suite

Expand the value of Drillinginfo's new LandTrac product. Drillinginfo's new DI LandTrac Suite is the first fully integrated land and well information delivery system for the domestic U.S. oil and gas industry. Combine the detailed lease outline information with our high-quality GIS maps on a bimonthly basis. Our LandTrac map products display all active leases within a county and are color-coded by acreage totals for the top 20 grantees. Includes reference legend table. Stay unified with DI's Landtrac Maps!

Don't need detailed lease outlines?

Use Drillinginfo's telescoped leasehold maps for a quick look at current lease positions in a given county. Maps are updated bi-monthly and display the approximate leasehold positions with color-coding for the top 20 grantees within each abstract/section. Lease positions are proportionally displayed as a percentage of each abstract/section. Don't forget to order as a paper image for display and markups or as a digital file!

Semi-Custom Maps

Want your information layered on a Drillinginfo standard map? Let DI do the work for you! Drillinginfo can add your lease acreage, pipeline, or seismic data as an additional layer! Need a more in-depth look at the activity? DI can also merge many of the standard layers into one or several distinct views. Contact Sales for additional information on DI's Semi-Custom Maps!
